

H&V FUEL FILTRATION

For Diesel and Bio-Fuel Particulate/Water Separation Applications

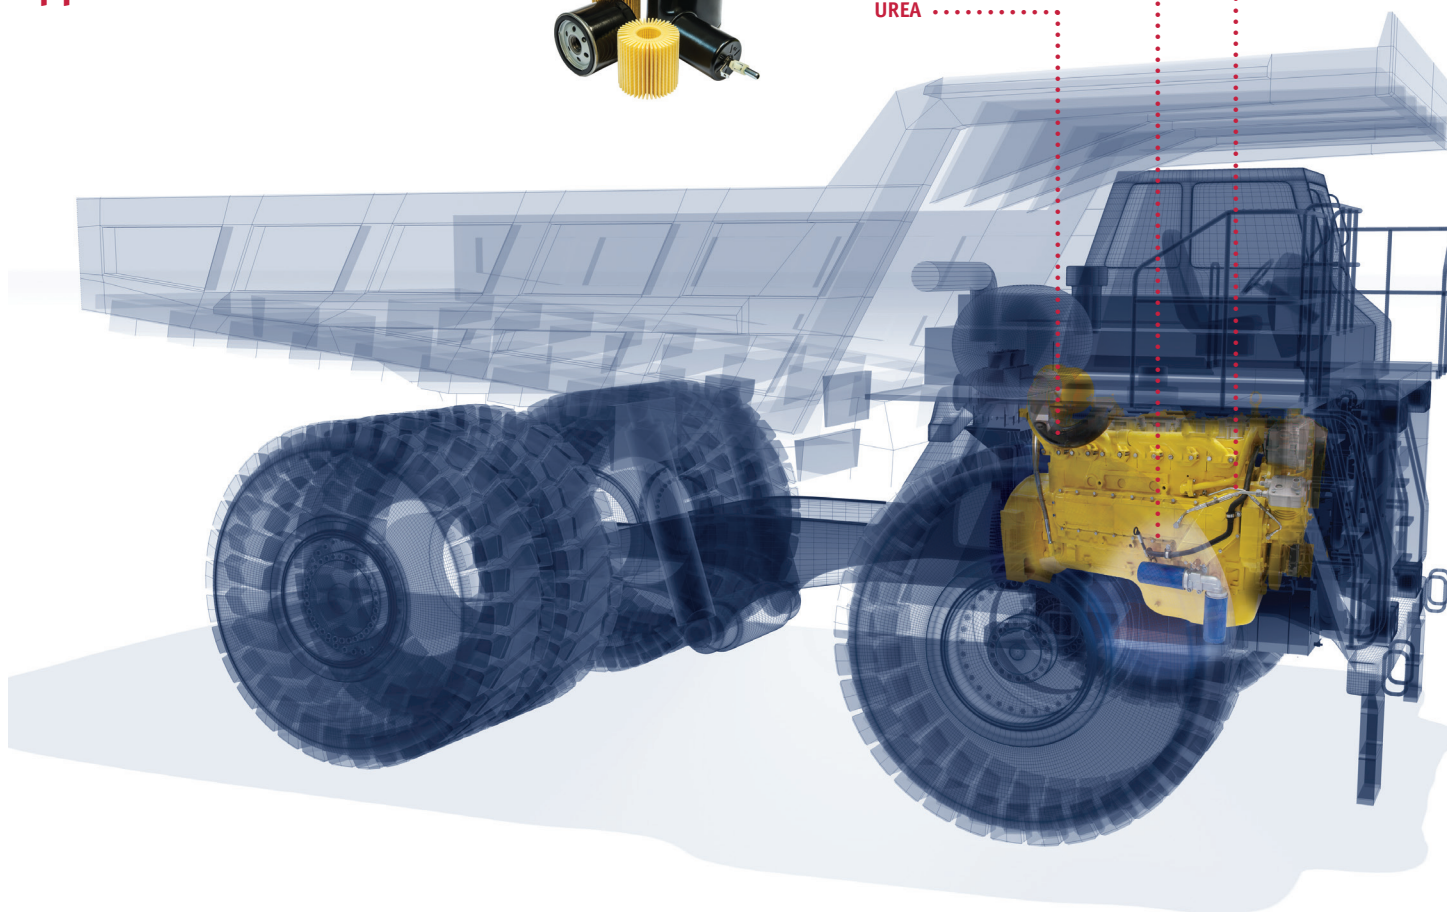

PREFILTER

DIESEL FILTER

UREA

- Capability to >99.99% efficiency @ 4 micron
- Glass-free or glass containing as required
- >95% emulsified water separation from fuel
- Designed to meet the latest emissions standards (EPA GHG, Euro VII, China VI, Bharat VI)

HV[®]
**Hollingsworth
& Vose**
*Advanced Materials
for a Cleaner World.*

H&V provides durable, consistent, long life filtration media designed to meet and exceed industry specifications for an array of diesel fuel applications. The complete line of H&V diesel fuel filter and fuel water separation media provides reliable engine and injector protection from particulates and water, extending the life of system components. The complete portfolio is designed for on-highway, off-road and industrial applications. Specific grades address demanding market needs such as challenging fuel quality, biofuel compatibility, and Urea.

GLOBAL PRESENCE

H&V maintains factories and research facilities on several continents, plus representation around the world. We offer global customers local production and service to ensure timely delivery, product availability, and consistent media formulations worldwide.

H&V global testing and design capabilities to meet local demands

- Sub 4 micron efficiency testing
- ISO 4020 Lifetime
- SAE J1488
- ISO 19438 Efficiency + DHC

Expertise in processes and fibers including: cellulose, glass microfibers, synthetic fibers, spunbond, meltblown, composites, and laminates

About H&V

Hollingsworth & Vose is a seventh generation family-run company and a global leader in the supply of advanced materials for filtration, battery separator and industrial applications. The company operates manufacturing sites and research centers in the Americas, Asia, Europe, and India and is headquartered in Massachusetts, USA.
